FOR A GREEN WORLD

ALL PIVOTS ARE GOING SMART

NEXUS G2

Installing a Nexus G2 offers opportunities to make the existing pivots smart, with their own radio infrastructure for reliable communication. This simplifies operation and makes it more efficient, with uniform control of all pivots via a single platform. The Nexus G2 control unit can be integrated seamlessly into control units of all pivot brands without any need to remove the old cabinet.

Dry and wet operation mode

Start and stop irrigation dates (7 programs schedules)

Automatic restart in case of power outage or pressure fail

Estimated time to finish after pressure fail

Error list history

The pivots components can be controlled without affecting the wiring, directional or end control. An optional pump control can enhance the processes and workflows. For safety and specific danger response, an alarm system can be added.
